ADVANCED TACTICAL RIFLESCOPE

## 1-8 x 24

Low-profile, capped adjustments  
.1 Mil-Radian increments

Daylight illuminated reticle;  
"Off" settings between  
brightness settings

34 mm body tube for  
superior strength and  
maximum adjustment range

Two-piece  
locking diopter

## True 1x, Daylight Visible Compact, Capable

Focal Plane	First
Objective diameter	24 mm
Tube diameter	34 mm
Internal adjustment	e: 30 Mil; w: 30 Mil
Click value	.10 Mil
Parallax adjustment	Fixed at 125 m
Exit pupil	1x: 11.26 mm; 8x: 3.19 mm
Eye relief	95 mm / 3.74 in
Field of view @ 100Y	1x: 96.1 ft; 8x: 13.1 ft
Overall length	10.06 in
Weight	21 oz
Mounting length	5.67 in
PTL	Standard
Available Reticles	FC-DM
Illumination	Daylight visible, adjustable
Elevation feature	Capped, low-profile

The ATACR™ 1-8x24 rifle scope is designed and built to be the ultimate low-power variable rifle scope. It includes pristine ED glass, bright daylight illumination, an intelligent reticle, very low-profile adjustments and bomb-proof reliability, with a field of view at 1x equivalent to open sights...but vastly more precise.

It measures just over 10 inches in length and weighs 21 ounces, with a streamlined profile. The daylight visible, center red dot allows for rapid engagements like a red-dot sight. Unlike a red-dot, however, the 1-8x provides up to 8x zoom to help locate, identify and engage targets at the maximum effective range of most rifles. The intelligent FC-DM first focal plane reticle provides precise hold and hold-off points. The low-profile turrets are capped to prevent accidental adjustment and offer true .1 Mil-Radian adjustment. To aid in fast magnification adjustments, an integrated Power Throw Lever (PTL) is included.
