

UP TO **45** JOULES

G-MAGNUM 1250

POWER-DESIGN-PRECISION

● POWER

With its monster 33mm on-board Gamo Power cylinder, the New G-Magnum 1250 delivers a higher volume of air than ever before to launch the pellet through the barrel and on to the target. Up to 36 Joules of energy when you need it most.

● EFFICIENCY

Gamo's latest propulsion system, the Gamo IGT MACH1, with Inert Gas technology instead of traditional spring, provides maximum efficiency, less vibration due to its one way recoil movement, improved control and true knock down power.

● PERFECT FIT

The new ERGOGAMO synthetic thumbhole all weather stock provides maximum comfort and grip for both right-handed and left-handed shooters.

● FEELING

The revolutionary C.A.T (Custom Action Trigger) allows the shooter to independently adjust the trigger pull to his or her preference. Maximum trigger control - Maximum precision.

● ON TARGET

Gamo's latest 49cm (19inch) barrel with an increased twist rate of 1/22 has been specifically developed for the G-Magnum 1250 thus assisting its increased velocity and accuracy.

● LIFESPAN

Gamo's latest air gun technology, the new triple R scope rail has been specifically designed to decrease the amount of shock/stress that is delivered to scopes by high powered air rifles. This latest ground-breaking technology from Gamo, increases the lifespan of your chosen optic.

● NO PAIN

The SWA butt pad (Shock Wave Absorber) has been precisely designed by Gamo to increase the recoil absorption experienced by shooting. Tests show a considerable shock reduction by up to 74% of felt recoil.
